Specialists in

the manufacture and installation of automatic entrance packages
aluminium doors and shop fronts, security doors, shutters, gates and ongoing maintenance

We like to make an entrance...

About Us

With a management team who have in excess of 65 years of experience, ENTEC are a leading specialist contractor who supply and install a wide range of automatic door operators, complete entrance packages and shop fronts into the retail, health, commercial, local authority and industrial market sectors.

Why choose ENTEC?

- Prompt, professional and accurate advice, with no obligation, leading to a good quality, fairly priced detailed quotation, which is normally achieved after a full and in-depth site survey.
- Specification of the correct products and accessories to suit you and your clients' needs.
- Professional well trained installation and service engineers all with Automatic Door Suppliers Association (ADSA™) British Standards BS EN16005 authorised technician certification.
- Quick turnaround framework packages, with rapid surveys and quotations where forced entry / ram-raid has taken place.
- Quality door automation products and high quality in house manufactured framework and door leaves.
- We will work with your requirements and guide you if we believe we can offer a different but more beneficial end result.
- We thrive on challenging fast turnaround and demanding projects and pride ourselves on our problem solving capabilities.
- No matter how challenging or demanding, ENTEC are always striving towards providing solutions for easier access.

ENTEC: Transforming Business

Shop fronts

ENTEC specialises in the design, manufacture and installation of commercial aluminium shop front entrances incorporating both automatic and manual door systems.

We specialise in fast turnaround remodelling projects, such as the one above in Cobham where we transformed this toy shop into a high end menswear retailer, including signage

and internal refit. Manufacturing all our own framework allows us to maintain a cost effective and affordable solution for our customers. The services we offer has led ENTEC to undertake successful installations for a number of the UK's largest organisations in the retail, health and commercial market sectors.

Revolving Doors

A revolving door is an excellent solution when separating the interior and exterior environments of a building are the main priority. Due to the way the door is constructed, it creates a total draft seal in any position throughout its rotation, resulting in optimal energy savings and a reduced carbon footprint. Not only is it functional but it also provides an elegant and eye-catching feature that will enhance the look of almost any building.

Automatic Swing Doors

Can be used both internally and externally in a wide variety of applications, from modifications for less able users to new bespoke entrances for high traffic retail operations, healthcare and public service environments and offer a convenient means of access when physically pushing or pulling a heavy manual door could prove difficult.

Manual Door Packages

At ENTEC we use a number of different aluminium profile systems and accessories which enables us to offer end users, specifiers or architects a comprehensive range of options when choosing their manual door solution.

Automatic Sliding Doors

Particularly suited to high traffic environments, where there is a limited amount of space available. Due to their adaptability and low ongoing maintenance costs, they can offer an excellent long-term entrance solution for any building. The microprocessor control system enables the highest possible safety at all times for users of all ages.

For further information on our complete range of products please visit our website:

Steel Security Doors

Steel security doors are the item of choice when protecting your commercial property. All our doors come supplied with a full range of product options and hardware and can be combined with automatic swing door operators and also access control systems that can be tailored to meet your requirements.

Curtain Walling

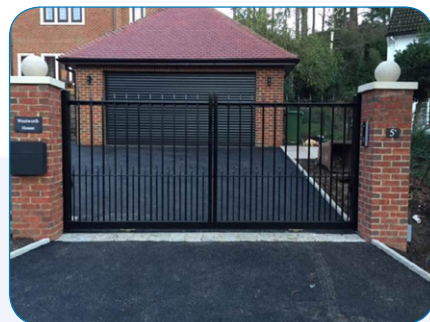

Curtain walling is a thermally broken non-load bearing wall, which forms the exterior envelope of a building or forms an entrance package. ENTEC can provide low rise curtain walling solutions for your project. Automatic and manual doors along with windows are a straightforward addition to any curtain walling project, with door automation often adding that finishing touch to an entrance project.

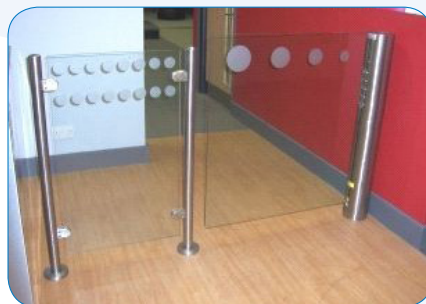

Gates and Shutters

ENTEC supply, install and maintain automatic / manual gates as well as security and industrial shutters.

Please discuss your requirements with us, so we can assist from design through to installation.

EMSW operator

Safety barrier

Additional Parts

ENTEC provide parts including door operators, sensors, finger guards, barriers and much more on a supply only basis.

Take a look at what our customers say about us...

“Many thanks to you all for turning out a great job, in such a short space of time it looks fantastic. I am positive we will be working with you in the future, thanks again.”

Hamptons International

“We have been using Entec for the last 6 years and find their services and back up response second to none and look forward to continuing this for all our future auto door requirements.”

Phoenix Aluminium Shopfronts Ltd

“Brilliant job, really appreciate your help, your engineer did not stop the whole time he was there and provided a very good service.”

Johnson & Sons

“We were really impressed with the service and the quality of the product from Entec Access Systems. I would have no hesitation in recommending them to our clients in the future and look forward to working with them again.”

Metric Office Furniture & Interiors

“Entec provide an excellent service over the phone and on site. Every job gets treated with the same high standard and the installation engineers are very helpful, reliable and knowledgeable. I will use Entec again on other projects and would also be happy to recommend to others.”

Frimley Park Hospital

Installation

And for installation surveys you may even see our quirky mini clubvan attending your site.
